SUBJECT: Contract AF33(600)40280
Change in scope - Item 16
Ground Support Equipment Special Items
Westinghouse Ref. AAN-45196-19

- Enclosure (1): Three (3) copies of "Description of Changes to Ground Support Equipment Special Items", dated October 15, 1962
- Enclosure (2): One (1) reproducible and six (6) copies Exhibit B, Section I, Ground Support Equipment Special Items, Revised October 15, 1962.
- Enclosure (3): Three (3) copies of Westinghouse Cost Analysis FE-777 Form dated October 18, 1962
- Reference (A): Westinghouse Letter to Special Projects Office ASZ-5, dated 27 August 1962; Subject - Contract AF-33(600)40280 Program Extension, Westinghouse Reference DKB 45196.

Gentlemen:

In negotiating the Proposal of Reference "A", we mutually agreed to re-submit the quotation for changes to the Ground Support Equipment necessitated by equipment changes, as a revision to the Exhibit established for the GSE under Item 16. An outline of the changes required is presented in Enclosure (1).

Enclosure (2) is the revised Exhibit, showing revised part numbers (661R046001 changed to 661R046002 and 661R047001 changed to 661R047002) and incorporating the increased estimated cost and fee previously agreed to for the changes.

Enclosure (3) is a Cost Analysis Supporting our CFF quotation for the changes of \$49,863 estimated cost plus \$3,500 fixed fee. This quotation differs slightly from our previous estimate due to Labor Adjustment and G&A rate changes made since our previous quotation.

25 YEAR RE-REVIEW

-2-

We wish to note that this estimate has simply been pro-rated to each item on the revised Exhibit, Enclosure (2), based upon the original ratio of estimated cost between the two items.

The equipment changes also require 2 additional Standard GSE items:

<u>Qty.</u>	<u>Part Number</u>	<u>Description</u>
1	HP - 212A	Function Generator
1	Sanborn - 150	4 Channel Recorder

By separate letter we will advise the Dept of this requirement.

Very truly yours,

WESTINGHOUSE ELECTRIC CORPORATION

Description of Changes to
Ground Support Equipment
Special Items

<u>Item No.</u>	<u>Qty.</u>	<u>Part Number</u>	<u>Title</u>	<u>Brief Description of Changes</u>
1	1	661N046001 Changed to 661N046002	System Test Simulator Consisting of:	
			(a) Frequency Converter	Provisions to supply precision reference frequency.
			(b) Frequency Translator	Modification of Modulators and addition of Buffer Amplifiers.
			(c) Target Simulator	Modification of Servo loop "A" and addition of Electronic Circuitry to provide for generation of a 1 kc offset frequency, necessary for Stability Testing. Redesign of Servo loop "B" to provide precision calibration of stability analyzer for accurate testing of system WFO. Redesign of Ramp Generator scope control circuitry to make possible testing variable Film Speed Recorder. Addition of a subsidiary control loop to Servo A to provide testing of HFT. and Angle compensation position loop. Addition of Buffer Stages to feed External Recorder.
			(d) Transponder	Modification of R.F. gating circuitry to facilitate CW operation, for testing HFT.
			(e) Stability Analyzer	Modification of Video Amp to add variable gain control, redesign of Modulators to reduce amplitude modulation for extension of sensitivity. Addition of CW mode for test WFO.
			(f) Range Resolution Test Pattern Generation	Redesign of Variable Frequency Generator and narrow pulse generator to simulate new transmitter parameters. Redesign of Delay Driver Circuitry to provide variable gate widths. Modification of Dynamic Range Circuitry.
			(g) Power Supplies

<u>Item No</u>	<u>Qty.</u>	<u>Part Number</u>	<u>Title</u>	<u>Brief Description of Changes</u>
1(cons't)	1	661R046001 Changed to 661R046002	(h) Control Panel	Redesign of Test Sequence Timer. Modification of control logic to facilitate additional test functions. Addition of precise pulse generating and counting circuitry to control accurate Film Speed Recorder.
2	1	661R047001 Changed to 661R047002	Evaluator Unit Consisting of:	
			(a) Range Resolution Optics Assembly	No Change
			(b) Azimuth Resolution Optics Assembly	Modification of optics to facilitate spectrum analyzing sine wave patterns. Modification of optics to increase evaluator resolution.
			(c) Evaluation Electronics Circuitry	Addition of logarithmic amplifier to provide linear Dynamic Range Readout.
			(d) Power Supplies	No Change
